

FRS development · seed 19 · 3 known tasks
Unique physical provider cost · adaptation n=3; evaluation n=3 per method/checkpoint

input tokens: 3,060,656 known; 3 calls missing usage

output tokens: 169,048 known; 3 calls missing usage

total tokens: 3,229,704 known; 3 calls missing usage

reasoning tokens: 23,128 known; 3 calls missing usage

0 no-network preflights. All recorded revisions and capped failures included; reasoning is part of output.

Any missing usage makes that sum a lower bound; input + output known sums need not equal the independently reported total when fields are missing.
